

Utilities & Smart Cities

March 16, 2016

Illinois Commerce Commission

AECOM

Who we are

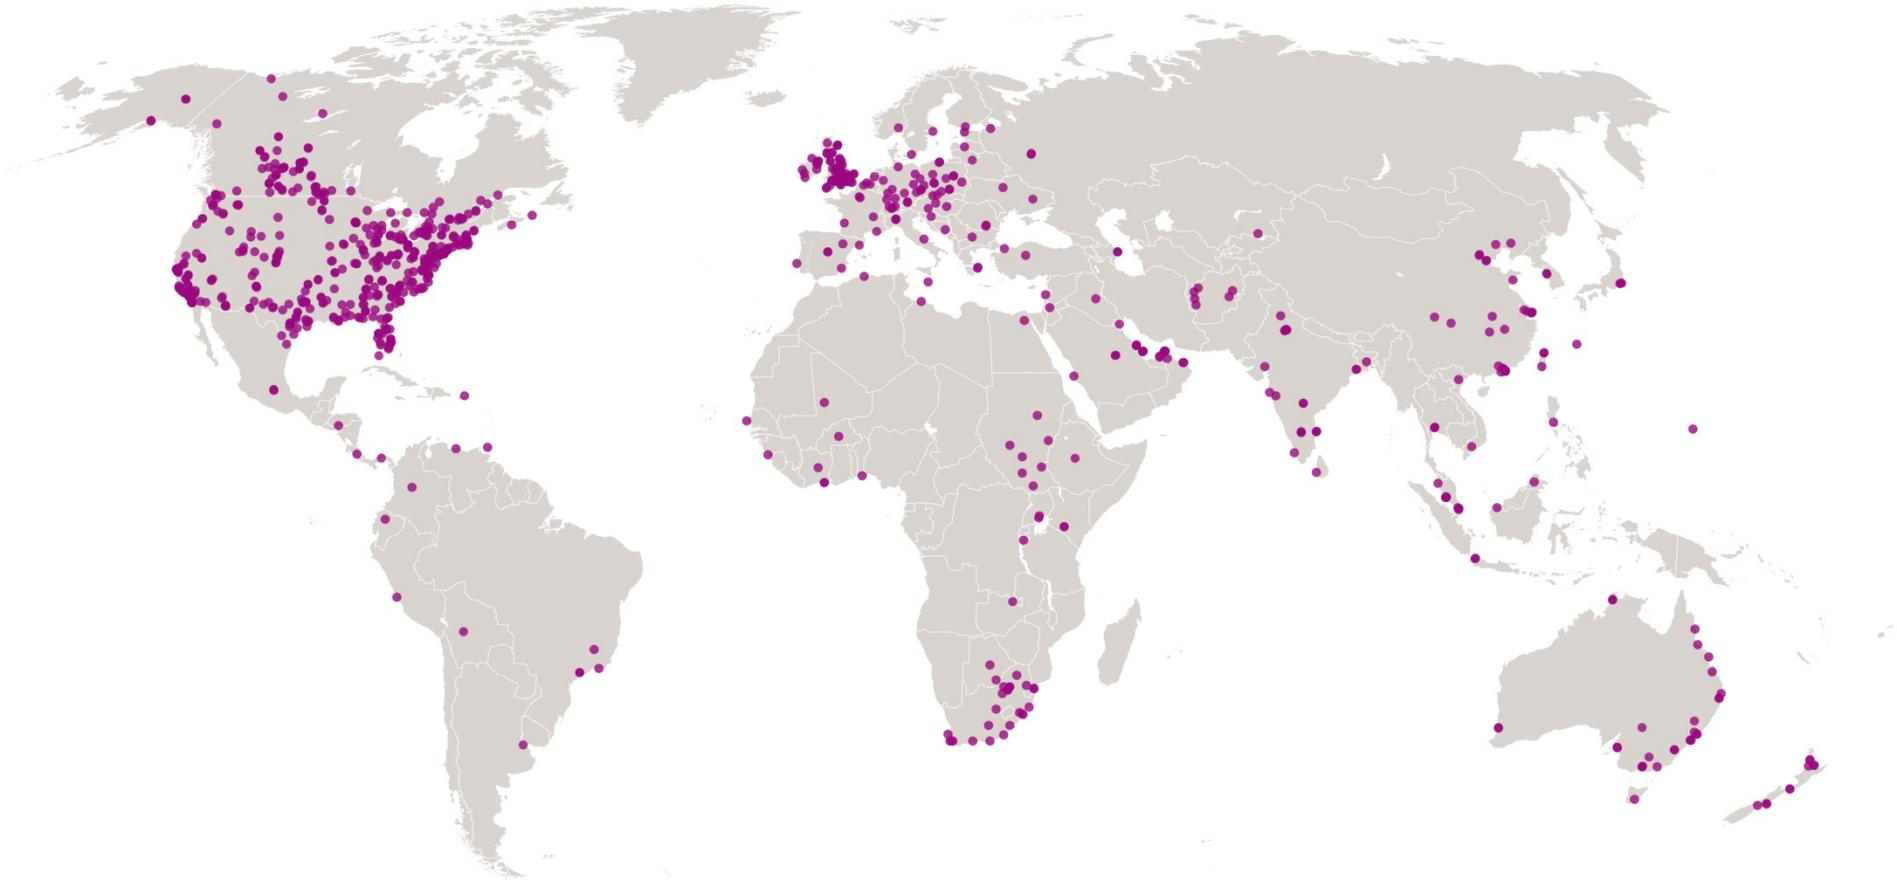

**City and utility
collaboration accelerates
smart city progress**

**Opportunities and
barriers for expanding
collaboration**

With an integrated team operating in more than 150 countries, AECOM works to positively impact lives, transform communities and make the world a better place.

Energy's central role in most smart city plans

The importance of city and utility collaboration in smart city success

- Business models
- Critical infrastructure
- Public service enhancements

The unique role that utilities can play in accelerating smart city progress

- Technology adoption
- Geographic coverage and equity
- Financial capacity

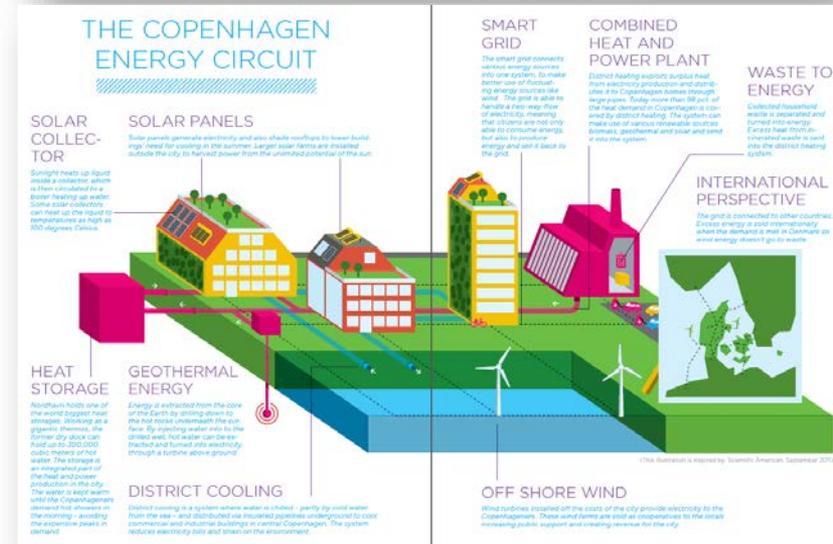

Opportunities and barriers to expanding collaboration

Business Model and Regulatory Gaps

Splintered funding and capital investment plans

Fiscal stress and crumbling infrastructure

SMART CITY INFRASTRUCTURE IS INCREASINGLY MULTIFUNCTIONAL

Utilities & Smart Cities Questions

An aerial night view of a city skyline, likely Chicago, with numerous skyscrapers illuminated. The city lights extend to the horizon, and a body of water is visible on the left. A white diagonal line runs from the top left towards the bottom right. A purple triangle is in the bottom right corner.
