Definition:

Ameren Illinois is required to report FTE metrics to the ICC demonstrating that at least 450 full-time equivalent jobs were created in the State of Illinois in a peak program year. The FTE metric is a calculation used to convert full-time and part-time jobs into comparable metrics.

$$FTE = \frac{\text{Total number of MAP hours worked in a period}}{\text{Available hours in the period; 2080 hours per year with a proration of 520 hours for quarterly reporting}}$$

The total number of MAP hours worked in a reporting period consists of employees working a MAP project, those employees in direct support and indirect support of a MAP project, as well as contractors working a MAP project and their indirect support of a MAP project. Additional productivity factors and manual adjustments have been made towards compensable hours; these adjustments vary based on category of FTE. Induced jobs will be used for annual reporting based on declarations validated through subsequent reports provided by the University of Illinois.
