$$\text{FTE} = \frac{\text{Total number of MAP hours worked in a period}}{\text{Available hours in the period; 2080 hours per year with a proration of 520 hours for quarterly reporting}}$$

The total number of MAP hours worked in a reporting period consists of employees working a MAP project, those employees in direct support and indirect support of a MAP project, as well as contractors working a MAP project and their indirect support of a MAP project. Additional productivity factors and manual adjustments have been made towards compensable hours; these adjustments vary based on category of FTE. Induced jobs will be used for annual reporting based on declarations validated through subsequent reports provided by the University of Illinois.
